

BUILD-MEASURE-LEARN FEEDBACK LOOP

Minimize **TOTAL** time through the loop

This Build-Measure-Learn feedback loop is at the core of the Lean Startup model. In [Part Two](#), we will examine it in great detail.

Many people have professional training that emphasizes one element of this feedback loop. For engineers, it's learning to build things as efficiently as possible. Some managers are experts at strategizing and learning at the whiteboard. Plenty of entrepreneurs focus their energies on the individual nouns: having the best product idea or the best-designed initial product or obsessing over data and metrics. The truth is that none of these activities by itself is of paramount importance. Instead, we need to focus our energies on minimizing the total time through this feedback loop. This is the essence of steering a startup and is the subject of [Part Two](#). We will walk through a complete turn of the Build-Measure-Learn feedback loop, discussing each of the components in detail.

The purpose of [Part One](#) was to explore the importance of learning as the measure of progress for a startup. As I hope is
