

3. I want to thank Caroline Barlerin and HP for allowing me to include my experimental analysis of this new project.
4. Information about Kodak Gallery comes from interviews conducted by Sara Leslie.
5. The VLS story was recounted by Elnor Rozenrot, formerly of Innosight Ventures. Additional detail was provided by Akshay Mehra. For more on the VLS, see the article in Harvard Business Review: <http://hbr.org/2011/01/new-business-models-in-emerging-markets/ar/1> or press coverage at <http://economictimes.indiatimes.com/news/news-by-company/corporate-trends/village-laundry-services-takes-on-the-dhobi/articleshow/5325032.cms>
6. For more on the early efforts of the CFPB, see the Wall Street Journal's April 13, 2011, article "For Complaints, Don't Call Consumer Bureau Yet"; <http://online.wsj.com/article/SB10001424052748703551304576260772357440148.html>. Many dedicated public servants are currently working hard to incorporate this experimental approach in the public sector under the leadership of President Obama. I would like to thank Aneesh Chopra, Chris Vein, Todd Park, and David Forrest for introducing me to these groundbreaking efforts.

Chapter 5. Leap

1. For example, CU Community, which began at Columbia University, had an early head start. See <http://www.slate.com/id/2269131/>. This account of Facebook's founding is drawn from David Kirkpatrick's *The Facebook Effect* (New York: Simon & Schuster, 2011).
2. Actual engagement numbers from 2004 are hard to find, but this pattern has been consistent throughout Facebook's public statements. For example, Chris Hughes reported in 2005 that "60% log in daily. About 85% log in at least once a week, and 93% log in at least once a month." <http://techcrunch.com/>
